

# PreHeater Instructions

**FUEL WARNING — DIESEL / KEROSENE ONLY  
NEVER USE GASOLINE OR 100LL**

## Fuel Check

- Check fuel using the sight gauge or blue screw-cap.
- Fill only from the red 2-gallon jug marked (PRE HEATER).
- **Refill is required at or below 1/4 tank.** Do not allow heater to run out of fuel.

## Startup

- Unplug charging cable from wall.
- Firmly press On/Off button before moving heater to aircraft.
- Startup is gradual—no immediate heat or fan noise.
- Full startup takes approximately 4–5 minutes.

## Installation

- Install heater hose / cowl plug in aircraft.
- Mooney inserts available on cart.
- Ensure heating has begun during walkaround.

# PreHeater Instructions

## Shutdown

- Long-press On/Off button for ~3 seconds.
- Heater will ramp down, clean burn, and cool automatically.
- No additional shutdown action required.

**IMPORTANT:** If someone is waiting, do NOT turn the heater off. Hand the running heater to the next person.
